Discover the property

In Terézváros, two apartments with separate entrances and separate land-registry titles offer city homes that are close together yet independent. Tall windows, galleries and modern kitchens combine the central building's character with contemporary comfort. The ornate entrance passage establishes the atmosphere on arrival.

The 65 m² apartment was fully renovated in 2025, and the 82 m² apartment in 2022. Both are offered furnished and equipped. Bioethanol feature fireplaces add atmosphere to evenings in the open-plan kitchen/living rooms, while the galleries give the interiors a distinctive identity.

The smaller apartment has one bathroom and the larger two. Marble-effect finishes, built-in storage and equipped kitchens create a coherent, carefully designed environment. A heat-pump system provides cooling and heating, and a lift serves the first floor. The two independent apartments allow living close together while preserving personal space.

In this central setting, daily plans can readily connect to city life. Metro links support travel, while the surrounding streets convey the atmosphere of historic Budapest. The offer preserves independence as two separate homes while providing a shared location for a city lifestyle that brings different needs together.
